Objective

Computer Science student at HCMUT with a strong interest in Artificial Intelligence, Machine Learning, and data-driven systems. Seeking an AI/ML internship to gain hands-on experience with real-world datasets, develop practical models, and contribute to intelligent software systems.

Education

Ho Chi Minh City University of Technology (HCMUT – VNUHCM) Ho Chi Minh City, Vietnam
B.Sc. in Computer Science – Japan-Oriented Program Expected Jul 2027

- Relevant Coursework: Machine Learning, Data Structures and Algorithms, Operating Systems, Database Systems, Software Engineering

Projects

Multimodal Chronic Respiratory Disease Diagnosis using Transfer Learning

Tech: Python, XGBoost, Scikit-learn, Pandas, NumPy, DenseNet, MIMIC-IV, CheXpert

- Developed a multimodal ML pipeline combining CXR (DenseNet transfer learning) and EHR data for CRD diagnosis.
- Addressed severe class imbalance using SMOTE and Random Over-Sampling (ROS).
- Built XGBoost models (XGBClassifier, XGBRegressor) for classification and EHR feature imputation.
- Improved minority-class performance: Recall from ~9% to ~43%, Precision up to ~96% with EHR integration.
- Demonstrated the effectiveness of multimodal learning through comparison with image-only models.

Technical Skills

Programming: Python, C++, Java, JavaScript

Machine Learning / Data: Pandas, NumPy, Scikit-learn, XGBoost, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation

Software Engineering: Object-Oriented Programming, Data Structures and Algorithms, Git, Docker, Linux, Debugging

Database: MySQL, SQL

Languages

English: TOEIC 700

Expected May 2026

Japanese: JLPT N3
