Objective

Computer Science student at HCMUT with a strong interest in Artificial Intelligence, Machine Learning, and data-driven systems. Seeking an AI/ML internship to gain hands-on experience with real-world datasets, develop practical models, and contribute to intelligent software systems.

Education

Ho Chi Minh City University of Technology (HCMUT – VNUHCM) Ho Chi Minh City, Vietnam
B.Sc. in Computer Science – Japan-Oriented Program Expected Jul 2027

- Relevant Coursework: Machine Learning, Data Structures and Algorithms, Operating Systems, Database Systems, Software Engineering

Projects

Multimodal EHR–CXR Learning for Chronic Respiratory Disease Diagnosis GitHub
Python, Pandas, NumPy, Scikit-learn, XGBoost, BigQuery

- Developed and evaluated machine learning models for chronic respiratory disease diagnosis using Electronic Health Records (EHR) and medical imaging data.
- Implemented data preprocessing pipelines and handled imbalanced datasets using Random Over-Sampling (ROS).
- Applied XGBoost for classification and compared performance between image-only and multimodal learning approaches.
- Evaluated models using Accuracy, Precision, Recall, and F1-score to assess classification performance across classes.

Technical Skills

Programming: Python, C++, Java, JavaScript

Machine Learning / Data: Pandas, NumPy, Scikit-learn, XGBoost, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation

Software Engineering: Object-Oriented Programming, Data Structures and Algorithms, Git, Docker, Linux, Debugging

Database: MySQL, SQL

Languages

English: TOEIC 700 Expected May 2026

Japanese: JLPT N3
